

1109 Saga short sleeve V-neck ladies

keeps the body cool & dry

Thin, lightweight functional bodywear for any kind of physical activity in warm indoor or outdoor conditions. THERMOCOOL® fibre provides duo-regulation designed to keep wearers in their comfort zone across different temperature changes and activity levels. The fabric helps you to be warm when you feel cold and cool when you feel hot. This base layer is designed to be worn next to the skin, either underneath outer layers or by itself.

fibre technology

The specially-engineered polyester fibre THERMOCOOL® is designed to work with the body's natural thermal capabilities through smart fibre cross-sections. It rapidly evaporates moisture thanks to its unique fibre mix. The fibres are designed to provide added evaporative surface, outstanding moisture transport and allow enhanced air circulation focussing energy on the evaporation process.

hygiene and freshness technology

The **SILVERPLUS®** finish protects textiles from unpleasant body odours. This biocidal product for hygiene and freshness uses the power of silver to bring long-lasting antibacterial properties to garments. The technology is eco-friendly and conforms to **bluesign®** and **OEKO-TEX® Standard 100**.

UV protection

This clothing is designed to offer protection against solar ultraviolet radiation exposure (UVA and UVB). The UPF measured is >15, meaning it offers good UV protection as more than 98% of the harmful UV-radiation is blocked by the fabric.

Note: Only covered parts of the body are protected. Take care of protection for other parts of the body (e.g. by wearing a hat and/or using sun milk).

care instructions

no fabric softener | wash dark colours separately

style information

style number: style 1109
name: **Saga short sleeve V-neck**
style group: Sage key Line
style sizes: colour XS - XXL
codes: 2000 WHITE
