

1413 Thor Short Sleeve Crew Neck

keeps the body warm & dry

Thin, lightweight and extremely elastic functional bodywear for intensive physical exertion or stop-and-go activities in fair and cold conditions. THERMOLITE® maintains the user's comfort zone: it provides outstanding moisture transportation and a soft surface next to the skin. The thermo buffering properties protect the user from temperature changes, keeping the body warm & dry. This base layer is designed to be worn next to the skin, either beneath outer layers or by itself.

fibre technology

The specially-engineered polyester fibre THERMOLITE® provides warmth and comfort without weight. Its hollow-core fibres trap in air for greater insulation for light, yet heavy-duty performance. Its larger surface area allows for fast evaporation by sending moisture away from the skin to the surface of the fabric, where it quickly evaporates.

hygiene and freshness technology

The **SILVERPLUS®** finish protects textiles from unpleasant body odours. This biocidal product for hygiene and freshness uses the power of silver to bring long-lasting antibacterial properties to garments. The technology is eco-friendly and conforms to **bluesign®** and **OEKO-TEX® Standard 100**.

UV protection

This clothing is designed to offer protection against solar ultraviolet radiation exposure (UVA and UVB). The UPF measured is >10, meaning it offers moderate UV protection as 90% of the harmful UV-radiation is blocked by the fabric.

Note: Only covered parts of the body are protected. Take care of protection for other parts of the body (e.g. by wearing a hat and/or using sun milk).

care instructions

no fabric softener | wash dark colors separately

style information

style number: 1413
style name: Thor Short Sleeve Crew Neck
style group: Thor Key Line
style sizes: XS - XXXL
colour codes: 1000 Black, 1300 Dark Grey, 2000 White

material specifications

fabric: 49% THERMOLITE® | 49% Polyester | 2% Lycra®
structure: 1/1 rib knit
