

# THE **DRHD** CR5

**CR5**  
CUT LEVEL 5

## OIL & GAS HAND PROTECTION

The DRHD® CR5 provides CE Level 5 cut resistance throughout the palm and fingers for maximum cut protection during drilling operations. Dual density Thermal Plastic Rubber (TPR) safeguards the users knuckles and metacarpals from blunt force impact, while dual density TPR with dedicated flex points provide critical pinch-point protection to the tip of each finger. 2mm EVA foam lies beneath the hard density TPR to help disperse blows to the top of the hand while the extended slip-on cuff protects the wrist. The palm is reinforced with durable synthetic leather and PVC bonded dots for durable gripping power in dry, oily and wet conditions.

### CUT RESISTANCE

Armortex® level 5 cut resistant palm with PVC bonded dots for grip.

### IMPACT PROTECTION

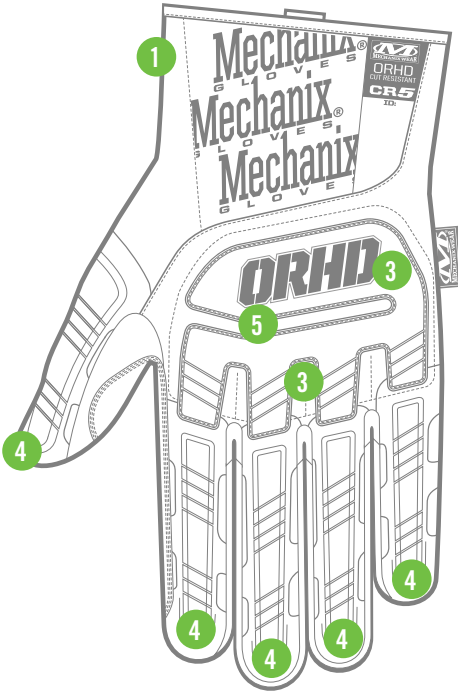

PVC bonded dots improve durability and grip in slippery conditions.

## FEATURES

1. Cuff ergonomics proven to protect and not interfere with long sleeves.
2. Stretch neoprene wrist panels create an unrestrictive fit.
3. Dual density Thermal Plastic Rubber (TPR) disperses forceful impact to the knuckles and metacarpals.
4. Dual density TPR provides pinch-point protection to the fingertips with dedicated flex areas for easy finger mobility.
5. Internal 2mm EVA foam insert absorbs and disperses impact to the top of the hand.
6. Additional synthetic panels reinforce high wear areas on the palm and thumb.
7. PVC bonded dots disperse liquids and enhance grip while reducing abrasion to the entire palm.
8. Top layer of synthetic palm is anatomically cut in flex areas to reduce bunching and material overlap.
9. The entire palm is layered with Armortex® Level 5 cut resistance.
10. High-risk red pull-tab allows the glove to be secured to person.

## CERTIFICATIONS

CE 4544

## INTENDED USES

- Oil & gas exploration
- Mining
